

Manual Dump Stations

01 DUST CONTROL

Every unit is equipped with a high-efficiency MERV 16-rated filter that captures 99.1% of airborne dust particles as small as 0.3 microns.

02 EASY UPKEEP

Service time is kept to a minimum with our gas spring-assisted access doors and tool-less filter removal design.

03 SEAMLESS INTEGRATION

Built to work within your material handling ecosystem, each dust collector integrates easily with upstream and downstream equipment.

Model	Washdown Ready	Filter Access	Filter Area	Compressed Air Use	Notable Features
FL Series	✔ Yes	Front	Standard	10 SCFM @ 50 psi	Sanitary-ready design for washdown environments.
FR Series	✘ No	Front	Standard	10 SCFM @ 50 psi	Efficient filtration for dry, non-washdown areas.
GB Series	✘ No	Front	Standard	10 SCFM @ 50 psi	Enhanced operator protection with additional enclosure.
SR Series	✘ No	Side	Extended	5 SCFM @ 50 psi	Expanded filter surface and external dust collection compatibility.

Each series can be customized with construction materials, finishes, and attachments to meet your unique application. Available enhancements include bag compactor integration, external dust hood for remote collection, and construction options in carbon or stainless steel with powder-coated, enamel, or FDA epoxy finishes.
